

PackUp

Store more. Stress less.

Rent storage space from people near you

THE PROBLEM

People have extra space they don't use. Others can't find storage they can afford.

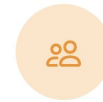

Wasted space

Garages, storage rooms, and small warehouses sit empty. Their owners earn nothing from them.

Storage is expensive

Storage companies charge high prices and ask for long contracts. They're not always close by either.

No easy way to connect

There's no simple app that connects the two sides — the way ride-sharing apps connect drivers and riders.

A COMMON SCENARIO

Two people who never met — and don't need to look far.

RENTER

Sara

Sara is moving to a smaller apartment for 3 months. She needs to store her furniture, but a storage company wants 400 SAR a month, with a 6-month contract.

OWNER

Noura

Noura has an empty garage in Al Olaya. She never uses it — it just sits there, earning her nothing, every month.

Neither of them knows the other exists. That's the gap PackUp closes.

THE SOLUTION

PackUp connects Sara and Noura — directly.

A platform where anyone can list space they're not using, and anyone nearby can book it. Everything else is handled for them.

1. Register

Create an account as an owner or a renter

2. List a space

Owners publish their space in minutes

3. Book

Renters check availability and book

4. Stay updated

Both sides get WhatsApp alerts

5. Review

Renters rate their experience

Owners stay in control. Renters book with confidence.

PUT

`/space/changeStatus/{spaceId}/{ownerId}`

Turn availability on or off

Owners can mark their space as available or not, any time — no more outdated listings.

GET

`/booking/checkAvailability/{spaceId}/{startDate}/{endDate}`

Check availability

Renters check that a space is free for their dates — before they book.

KEY FEATURE · 2 OF 3

Every update reaches the user right away — on WhatsApp.

PUT /booking/cancelBooking/{bookingId}/{renterId}

Cancel a booking

Sends the renter an instant WhatsApp cancellation notice.

PUT /booking/extendBooking/{bookingId}/{renterId}/{newEndDate}

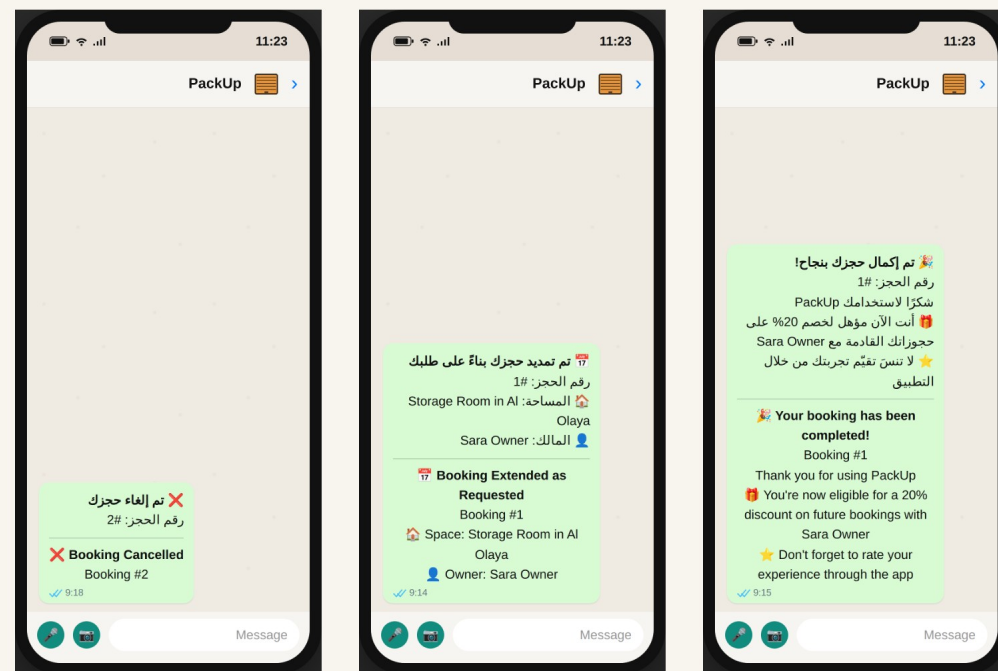

Extend a booking

Sends the renter a WhatsApp message confirming the new end date.

PUT /booking/completeBooking/{bookingId}/{renterId}/{newAmount}

Complete a booking

Sends a thank-you message, plus a 20% discount for next time.

Built-in trust, and a clear view of earnings.

PUT

`/user/blockRenter/{ownerId}/{blockedRenter}`

Block a renter

If a renter causes problems, the owner can block them from booking again.

GET

`/booking/calculateProfits/{ownerId}`

See total earnings

Owners can see how much they've earned from all their completed bookings, in one place.

POWERED BY AI

Writing a good listing description takes seconds.

OWNER PROVIDES

- Title
- City & address
- Price & size

GEMINI GENERATES

A ready-to-use description, written in Arabic and English at the same time.

POST /space/generateDescription — this one call asks Google Gemini to write the listing, so the owner doesn't have to.

POWERED BY

The two integrations in PackUp

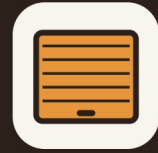

GREEN-API

Sends automatic WhatsApp notifications for every key booking event.

Google Gemini

Generates bilingual, ready to publish space descriptions on demand.
